

Puzzle Packs

For many students, doing puzzles and games is a fun way to learn. Each Puzzle Pack has a variety of these kinds of activities related to a particular book. They are divided into two main sections: one section of activities related to the content of the book and one section of activities related only to a list of vocabulary words extracted from the book.

CONTENT SECTION

The section of materials related to content reinforces characters' names, places, symbols, themes, and other important ideas and things from the book. If you are familiar with the LitPlan Teacher Packs, think of this section as a big expansion of the Unit Resource Materials section of the LitPlans. Included in this section are:

- 1 word list with clues
- 4 matching worksheets
- 2 word searches with words given
- 4 crossword puzzles
- 4 fill in the blanks worksheets
- 4 magic square worksheets
- 2 word searches with clues given
- 32 bingo cards
